## The electric connection

The Electric Connection, Inc. has been a family owned and operated business in the greater Columbus area since 1983. During this time, we have been involved in all types of electric installations including new, remodel and service work for residential, commercial and generator customers. We believe in customer service to the point we have a 100% satisfaction guarantee. We believe our customers are our best form of sales. We stand behind our products and craftsmanship at all times and we are not satisfied with any job unless the customer is. We invite and encourage all customers to visit the BBB and check our record with past customers. We are confident you will be the next satisfied customer of The Electric Connection, Inc.. Electric ranges have become the go-to cooking appliance for most households. That's because they provide even and consistent heat, resulting in perfect meals every time. They are also easier to install and often feature flat glass-ceramic cooktops that are easy to clean. Electric ranges are an excellent choice for energy-efficient and eco-friendly homes, especially if you produce electricity using solar panels, micro-hydro, or wind turbines. These appliances are available in several sizes, styles, features, and at budget-friendly price points. Without much delay, let's take a look at the best electric ranges available on the market in 2021. This stainless steel 30-in. electric range by GE gives you a lot of bang for your buck. You get four radiant smoothtop burners on the cooktop, two of which are dual-sized 9-in. /6-in., meaning they can adjust to accommodate different-sized cookware. With a 3100W power output, these two can also boil water 25 percent faster than the standard GE elements. The 5.3 cu. ft. capacity oven has two oven racks, offering enough room to prepare an entire meal at once. The oven also features a dual-element bake where both lower and upper elements produce even heat for great, consistent results. Once you're done cooking, the self-clean function reduces left-over food into ash, so you don't have to scrub or use harsh chemicals during cleaning. The GE JS645SLSS is aesthetically pleasing thanks to its stainless steel fixtures, glass-ceramic surface, LED interior lighting, and big view oven window. This Frigidaire's 30-in. slide-in electric range comes with everything you need to prepare meals for your family with minimal hassle. The 5.0 cu. ft. oven with two oven racks can accommodate multiple courses simultaneously, allowing you to cook for a large group in less time. And, with even baking technology, you can expect it to bake foods faster and evenly. The real showstopper is the cooktop with four cooking elements and varying power outputs of up to 3000 watts to meet various cooking requirements. More cooktop flexibility is offered by the SpaceWise® Expandable Element that expands from 6-9 inches to fit smaller and larger cookware. When you need extra space for your cooking tools, the Store-More™ storage drawer provides the room you need and saves you cabinet space. The LG LREL6323S 30-in. electric range is designed to transform your kitchen. It comes with the latest features to help you cook all your favorite foods perfectly. The cooktop, for starters, has five burners that produce different power outputs of up to 3200 watts to meet various cooking requirements. You can also adjust two of the elements to fit your smallest and largest cooking pots. With 6.3 cu. ft. of space and three oven racks, the oven gives you enough room to cook multiple dishes at once. But what you'll love most is the built-in air fry that lets you make crispy snacks without using oil. Lastly, enjoy monitoring and controlling your range with the LG Smart Thin® app on your smartphone. Additionally, WiFi connectivity enables the SmartDiagnosis™ feature, allowing LG to remotely diagnose problems with your range and potentially save you hundreds of dollars in service calls. Experience the power of induction and convection cooking with the Italian-made Bertazzoni PROF304HNMXE model from the Professional Series. The induction cooktop has four elements with varying power outputs (up to 3,700 W) and sizes to accommodate varied cooking needs and cookware. The 4.7 cu. ft. capacity true European convection oven is equipped with dual convection fans that provide even temperature and balanced airflow for perfect baking and roasting results. The glass-ceramic surface, tempered glass oven door, and European-style cooktop control knobs achieve a modern look that adds a touch of refinement to your kitchen, and this stylish design is topped off with Bertazzoni's signature temperature gauge Samsung home appliances are loved for their performance, flexibility, and stylish looks, as evidenced by the Samsung NE63T8711SS. The cooktop features five cooking elements, including one for keeping food warm and two high-power Express Boil™ elements that produce up to 3,600 W of power for quick boiling. There's a hot surface indicator light to remind you not to touch the cooking zones, thus preventing accidental burns. The 6.3 cu. ft. capacity convection oven continuously circulates air through the oven cavity, thus allowing your food to cook faster and more evenly. With an air fry setting, you can cook all your favorite fried foods with little to no oil. You'll also love the smart capabilities that this appliance offers. It intuitively learns how you like to cook and simplifies oven settings using the Samsung Smart Dial. You can also monitor and control your appliance through the SmartThings™ App on your smartphone. Which brand of electric range is best? It's hard to point to just one as being the best since each brand's ranges appeal to different customers. The best brand should make appliances that offer you tons of functionality and practicality with a finish that suits your kitchen style while still being within your budget. All the brands mentioned above fit this description, making their ranges worthwhile. What should I look for when buying a range? There are so many things to consider when selecting a range, but the most important ones are fuel type (gas or electric), size, and style (freestanding, slide-in, or drop-in) as these will determine the features you get, performance levels, and prices. Talk to an Engineer Blog Cart | 0 Login Great guys who were very knowledgeable and quite efficient. Very reliable. You're everything all rolled up into one!Jill PringRoswell, GABoth crews for this project did outstanding work. Our residents and staff thank Peter, Richard D., and both crews for completing this project in a timely and professional manner. Account manager Richard Deininger does an excellent job with us and responds in a timely manner.William PundSandy Springs, GARichard and Robert did an excellent job! I could not be at the appointment due to a work commitment, so my mother met with the electricians for me. They were very patient with her while she communicated issues back and forth to me so that I could make the final decisions. They were also very helpful with the placement of lights for not only function, but aesthetics as well! My mother said that she has never been more impressed with a company and that she now wants to be a customer of Meer Electric as well!C.L.Brookhaven This was my first time using Meer - from the office phone call to the service, everything was excellent. I will recommend you to all of my friends and co-workers!Kim ShayRoswell, GAThese were two of the nicest guys I've ever had work in my home. Although my repairs were simple this time, over the years I've had a hard time finding electricians that could figure out difficult wiring issues. Meer has always been able to get a smart electrician who can work through difficult situations and solve the problems. I could not ask for anything more. Great guys - neat, friendly and knowledgeable.Patty GrimesAlpharetta, GAYou exceeded my expectation. We'll rave about you.Laurie CharltonRoswell, GAI have been very pleased with all the work done for me by all Meer employees involved. Quick response with excellent technicians.Tom EmbreyAlpharetta, GAVery professional and courteous! I will hire Meer again for other work! Good job! Price is very good too!Kwang KimRoswell, GARichard and Frank were great. Professional but friendly and good sense of humor. Job was done quicker than expected and it was done "Right".Richard PieperRoswell, GA Since our beginning in 1969, we at Nelson Electric Co. have built ours through innovative thinking, inventiveness, precision, reliability, and the highest quality - the foundational elements of Eastern Iowa's reputation for craftsmanship. With combined electrical and project management experience totaling more than 100 years, Nelson Electric Co. has enough people and equipment to handle most any project, whether it's commercial, industrial, lighting management, solar energy, or the maintenance and service of existing equipment and wiring. Through unquestioned service, on-target effectiveness and efficiency, and competitive pricing. > Learn More June 7, 2021 2022 Toyota Corolla Cross preview Larger than the front-wheel-drive Toyota C-HR and taller than the Corolla sedan, the 2022 Toyota Corolla Cross also borrows its looks from another Toyota—the RAV4. 2022 Hyundai Santa Cruz pickup gets crossover-like fuel economy The 2022 Hyundai Santa Cruz bridges the gap between the utility of a small pickup and the convenience and comfort of a compact crossover SUV. Fortunately, its fuel economy figures released Monday lean more toward crossover than pickup. Tesla announces 3 recalls of Model 3 and Model Y for brake, seat belt issues The Tesla Model 3 and Tesla Model Y have been recalled for three issues that involve physical inspection and possible repair—not an over-the-air fix. From Motor Authority: 2021 Ford Mustang Mach-E GT Ford's built more electric Mustangs in 2021 than gas-powered ones Ford may be building more examples of the Mustang Mach-E compared to the Mustang, but the traditional car is still winning the sales race. Deep dive: The Yenko Camaro and Dodge Challenger from "2 Fast 2 Furious" Tuner cars defined the "Fast and Furious" franchise early on, but muscle cars have been featured throughout the series as well. 2023 BMW X7 spy shots: 7-Series styling in the cards for flagship SUV BMW's X7 is being updated to match the radical new look pegged for the next 7-Series. From Green Car Reports: 2021 Tesla Model S Plaid Tesla cancels Model S Plaid+ ahead of event: What about 520+ miles of range? Tesla CEO Elon Musk has announced the cancellation of the Plaid+ version of the Model S due to go more than 500 miles on a charge. Report: Tesla will change battery chemistry for Model Y in China Tesla may turn to different NCMA cells from LG for its Model Y built in China, so that it can continue to expand production. Biden will push for more US EV battery recycling, address supply shortages Raw materials and supply chain concerns are at the core of a push for more of the materials within EV batteries to stay in the U.S.
