## Eesa vb mapp pdf

I remember when I first started teaching, the assessment tools I used were not an appropriate educational fit for my students. I constantly felt frustrated with assessing students and I never felt like I had it down. Then, I met the VB-MAAP and everything changed. The Verbal Behavior Milestones Assessment and Placement Program (VB-MAPP) is a Language and Social Skills Assessment Program for children with Autism or Other Intellectual Disabilities, per the cover of the guide. More simply, it is the perfect assessment tool for my students with autism that have lower cognitive profiles and are either non-verbal or have limited verbal skills. I'm going to break this post down into four main parts of the assessment. Milestones Assessment The milestones are the meat of the assessment. There are three different levels: Level 1 (color-coded orange), Level 2 (color-coded green) and Level 3 (color-coded blue). The milestones cover a variety of skills, including mand, tact, listener-responder, visual perception, social behavior, and motor imitation. More skills such as feature, function, class, and reading skills are built into Level 2 and 3. If you don't know what those terms mean, don't worry! The introduction does a great job at explaining the basic terminology to help you be successful with the assessment. My favorite part is the suggested IEP goals. What good is assessment data if you don't know what to do with it? You can see where your student's deficits are and use the suggested IEP goals to formulate your plan. Barriers Assessment The barriers assessment looks at 24 different behaviors that might be interfering with your student's progress. The great thing about the barriers assessment is it gives you concrete terminology to discuss behaviors. Instead of saying, "This student is very hyperactive," you can talk about what hyperactive behavior is and how it impacts the student. Behaviors are rated on a scale of 0 (no problem) to 4 (severe problem). Behaviors that score a 3 or 4 are highly likely to be impacting the student and are good areas where you can increase your interventions. Early Echoic Skills Assessment The Early Echoic Skills Assessment (EESA) tests a child's ability to repeat speech sounds. Different areas tested include phonemes, syllables, and intonations. It also walks through the typical progression of skill acquisition with regard to speech skills. It helps you know where a student is with their speech skills and a good direction to move forward. Transitions Assessment The transitions assessment pairs the scores of the milestones assessment, barriers assessment, and EESA. It also adds in other important areas including classroom behavior and toileting skills. It helps give a concrete snapshot of where a student is and answers some of the important questions that might be asked by the new teacher in the transition process. The VB-MAAP is a criterion-referenced assessment tool widely used in Applied Behavior Analysis (ABA) and other special education fields. It is a respected assessment tool and will help you become more prepared when talking about your student's learning profile. You can learn more about the VB-MAPP here and grab it on Amazon here. If you are more of a visual/auditory learner, I recorded a video here walking you through the VB-MAPP. If you are feeling overwhelmed by administering the VB-MAPP, check out my resource kit here! I love using the VB-MAPP in my classroom. It makes a stronger IEP and a stronger plan for my students. My students make more meaningful, measurable progress. It creates a great base for my team and helps my classroom run smoothly. If you have any questions, don't hesitate to ask! Please copy and paste this embed script to where you want to embed VB-MAPP App for iPhone, iPad and Web An electronic scoring system for the VB-MAPP. Contains all the content from the paper versions of the VB-MAPP Guide and Protocol. Quick and easy scoring of the Milestones, Transitions, Barriers and EESA subtests. Automatic charting of the data. Automatic reporting of the results with IEP goals. Export the assessment results in PDF format, and send them right to parents and colleagues. VB-MAPP App for iPhone, iPad and Web Your browser does not support HTML5 video. VB-MAPP Web-Based Training - 15 BACB CEU Credits These online, self-paced training courses are audio and video rich and taught by Liz Maher, MEd, BCBA. Hands on exercises provide the necessary experience participants need to feel confident when Using the VB-MAPP App, Conducting the VB-MAPP Assessment and then Teaching students after the VB-MAPP Assessment. This VB-MAPP web-based training library is offered for \$149.00 per participant per year. It is available 24x7 and you can start any time! The audience for this training is BCBAs, BCaBAs, SLPs, Psychologists, and educators working in ABA settings with students with Autism. As the training reviews Skinner's analysis of verbal behavior as well as the elementary verbal operants, undergraduate, graduate college students and parents are also very welcome. Group rates are available! The training shows everything you need to use the VB-MAPP App, conduct the VB-MAPP Assessment and a complete guide to teaching techniques after the VB-MAPP Assessment has been completed. Interactive video forums allow you to ask questions and receive answers from Liz. This service should be used both as a training series as well as a reference and assistance service as you provide evidence based instructional services to your students. This 1 full year subscription includes three courses and 15 BACB type 2 CEUs: Using the VB-MAPP App for iPad, iPhone and Web1 hour0 CEUs Conducting the VB-MAPP Assessment8 hours5 CEUs Teaching students after the VB-MAPP Assessment12 hours10 CEUs VB-MAPP Web-Based Training - 15 BACB CEU Credits Your browser does not support HTML5 video. ABA 101 Web-Based Training ABA 101 is a self paced, unlimited usage, eight-hour training course with over 300 video examples and learning-enhancing exercises to ensure that the staff at your clinic, school or center have the skills and resources necessary to follow through meaningfully in Applied Behavior Analysis environments. Taught by Liz Maher, MEd, BCBA, this course covers the following key concepts: Working with students with special needs The Science of Applied Behavior Analysis Increasing good behaviors, decreasing bad behaviors Pairing Using a Good Assessment and Curriculum Teaching our learners to communicate Teaching skills Problem behavior ABA 101 Web-Based Training Your browser does not support HTML5 video. VB-MAPP Training at your location - up to 8 BACB Credits Introduction to the Course What is ABA and how does it relate to language? What is the VB-MAPP? The VB-MAPP Milestones Assessment The Early Echoic Skills Assessment The Task Analysis and supporting skills list The Barriers Assessment The Transition Assessment Interpreting the results Training held at your location This two day onsite course is priced at \$400.00 per participant and includes a printed course guide, a very experienced BCBA as your instructor and lots of hands on activities and exercises that ensure all students in the course can really conduct the VB-MAPP assessment! The audience for this training is BCBAs, licensed psychologists, and educators working in ABA settings with students with Autism. As the training reviews Skinner's analysis of verbal behavior as well as the elementary verbal operants BCaBAs, students, and parents are also welcome.
