Steve Lander The Thinkstock Images / Comstock / Getty Images iTunes is much more than a media management application. It is also a door of access to one of the largest media stores in the world, iTunes Media Store. When you download a movie via iTunes, Apple sends the file to your computer. The iTunes program determines where it is saved based on the configuration. By default, iTunes creates an iTunes Media folder inside an iTunes folder in the main music folder. Unless you have changed the location where Windows saves your files, both Windows 8 and 7 use the «C directory: Users user name iTunes iTunes Media.â €» To find the exact route, Go to this directory, replacing A «UsernameÂ» with the name you use to access your computer. All files downloaded from iTunes are sent to the iTunes Media folder. On Mac, iTunes works the same way. It also creates a rooted iTunes folder where you create an ATUNES Media subfolder for all your downloads. Unlike Windows, use a different directory scheme. To find files on a Mac, search Users / Username / Music / iTunes / Itunes Media. Replace «UsernameÂ» with your actual user name. If you don't like the current storage path, you have two options. One is to take the downloaded movie file and move it alone by cutting and gluing it into a new unit or directory. When you reopen the file in iTunes, the program will ask you to say where the new file is located. The other option is to have iTunes move all its iTunes directory to a different location. You can do it via the iTunes preferences tool. By default, iTunes stores downloaded files to the computer's main hard drive. If you have a lot of iTunes downloads and other material stored on your hard drive, you could exhaust the space quickly. Move iTunes files, whether you do one at a time or in one shot, saves space on the main hard disk. This also means that you will have space to download more movies. By Liz Jacobs I downloaded Michanolimit image from Fotolia.com Mozilla Firefox is a web browser similar to Internet Explorer or Google Chrome. The browser is part of the Mozilla Application Suite. Firefox makes the download of simple movies because once downloaded, a window opens that it allows you to immediately access the download. Download a movie in Firefox is very similar to downloading a movie in any other browser. However, the download window looks different, because Firefox has its own browser's unique interface. Go to a site like Netflix, movie download, # 1 online movie download, Joost or Hulu. (See Resources and References). Subscribe to the site. Some sites offer a free 30-day trial. Some listed sites are completely free. Select the «Films.» category click on Cinematographic you want to see, as a comedy, drama or horror. Click on the film that interests you. Click on «Download.Â» Some sites, such as Hulu, do not include a download button. Their films pass through the network. To download them, go to a site like Video Downloader or Vidimonkey. Copy the URL of the movie you want to download. Put the URL in the box on KeepVid, Video Downloader or Vidmonkey. Click "Submit". and your movie will start downloading to your computer. Click on the file from the download window. Click on "Open." Your movie will start playing. Radio is making a huge comeback through podcasts. Now you can find podcasts just about anything and all you need to do is subscribe and download. But what should movie lovers listen to on their commute or even at work? These are 10 awesome podcasts out there for every kind of movie lover. There's a podcast for you if you're more in critically acclaimed movies, or you love "so bad is good" movies, or you love reading scripts not made online. Every movie lover should try these ten podcasts at least once. 1. "How was this done?" Source: Earwolf If you like watching terrible movies or just hearing them being ripped off by people who love them, then this podcast is for you. Paul Sheer and Jason Mantzoukas of Legaue, and June's Grace and Frankie Diane-Raphael are usually joined by a guest to talk about a bad movie and its holes in ridiculous plot, acting, lines and more. Don't assume this is powered by haters. Many times the hosts actually go out enjoying and recommending the movies they review. At the end of each episode they also have a section called "second opinion" where they read five star reviews of each movie. Of course sometimes the hosts actually find out how some of these movies are made through interviews with people who have worked on the movies themselves. It's really an eye opener to the chaos that can happen on the set of a bad movie. 2. "The Blacklist" Source: The WolfPop If you're a fan of reading scripts in particular, then this is right on your alley. This podcast takes scripts that have not yet been made and get stars to sit down and make a table read of it. Former development manager Franklin Leonard likes to refer to the episodes as "ear movies" and breaks every script into four parts. The show changes genres up so one month you could be deep into a drama while the next could be listening to a comedy. Many of the fans are able to vote which scripts will do next. There also tends to be bonus episodes with an interview with the writer. 3. "I was there too" Source: WolfPop Have you ever wondered what it would be like to be on the set of The Exorcist? Or one of the passengers at Speed? Well this podcast has Matt Gourley interviewed actors who were in classic movies and TV scenes telling their stories watching all the magic happen. This is a fun way to get an inside look in the industry from the extra point of view or supporting roles. 4. "Maltin on film" Source: WolfPop Conosci Maltin from his annual film guides evaluating films so you know what you're getting before hitting the theater. Now he's got a podcast with Grace and andVaughn to talk about the favorite films of the film critic and some films that probably has more watched. 5. â € œDovete remember this "source: American Public Media If you like to look in Hollywood's history, then this podcast will leave you out of your mind. Founder of cinemactical.com and former cinematographic critic Karina Longworth houses the show and immerses in the first century of Hollywood. Longworth reaches the fund of conflicting relationships, mythology and institutionalized rotation to understand what exactly was happening at that time. 6. â € œThe Flop Houseâ € Source: The Flop House Another option for people who love bad films is this podcast. Host Elliott Kalan, Dan McCoy and Stuart Wellington watch movies that were or commercial flops or considered flops from critics. The episodes will make you laugh like the three dips in these crazy films and what makes them so bad. 7. â € œThe treatmentâ € source: KCRW Host Elvis Mitchell who knows so much about films has deep interviews with people working in entertainment, art and pop culture. He got people who are at the top of their game like Wes Anderson, Broad City abbi Jacobson and Ilana Glazer, Nick Kroll, and more. 8. â € œMarvel Movie News from Marvel Fansâ € Source: Schmoes Know wherever you turn, you feel voices on new Marvel films. So where can you take it all in one place? This podcast! Every Thursday hosts Matt Key, Matt Cook and Meredith Placko meet to discuss the latest news from the Marvel movie. They tell you what is real and what is just a voice and more. 9. â € œThe dissolveâ € source: dissolving this podcast looks at the recent cinematographic outings and use them to have discussions on cinema. The hosts are made up of the dissolve staff and speak of tropes like Manic Pixie Dream Girl, Box office trends, and the staff often plays fun games in the air. 10. â € œSlateâ € " s Spoiler Specialsâ € Source: Slate Spoiler Specials Slate is immersed in new movies and their plots without keeping back for spoilers. If you have just seen a movie and you're dying to find someone who has too much to talk about it, then you will surely want to download their episodes. You will open your eyes to something you may have lost and more. Discover Entertainment Cheat Sheet on Facebook! More information from Cheat Sheet: Some streaming services have existed for years without the possibility of downloading shows and movies for offline viewing, but that the functionality was available on day 1 on Disney +. There are more than 600 titles in which to immerse yourself, enough to bend hundreds of simpsons hours without looking at a fifth of what is available. Perfect for air travel and Frugal Data Spender, the service download function â € "which is exclusive for mobile applications like this writing â € " â € " so simple even OLAF could use it, and with each title suitable, It's just a matter of understanding what you Here, we will take you through the process of both both and deletion of movies and shows from your Disney app +. Explore Disney + Download movies and shows on Disney + Step 1: Select the quality of the download Before having fun, let's talk about file size. If injured for storage space on your iPhone or Android smartphone, Disney + includes a variable quality feature that allows you to sacrifice visual fidelity for a smaller fingerprint. Open the Disney+ app on your smartphone (iOS, Android) and click the profile icon on the bottom right. From there, navigate to Settings app> Download Quality. See the options for standard, medium and high, the latter that probably does not offer any resolution greater than 1080p. Step 2: Download your content because you can view each disney + offline title, no conjecture or filter is required to find downloadable content. The hardest part of this particular task is to understand what you want to look at. Once you understand, all we have to do from the movie or show is Tap the download button, which is located at the end of the game button under the title logo. For shows, you can also find a separate download button next to each episode if you don't want the whole season. Disney takes care of magic from there. It's a relatively fast download on Wi-Fi, especially at the lowest quality, so you can probably take advantage of dozens of movies in those couple of hours before the flight if you forgot to do it the night before. Step 3: Look at your downloaded movies and show all that has been left to do now is have fun! A simple way to find downloads is by hitting the download icon, which is always visible in the bottom right of the Disney App +. All of your content will be listed here, sorted since you downloaded. Tap the PLAY button on the thumbnail of anything you want to watch and go away. The episodes are listed a bit differently â € "is nested under a single label, and touching it will present all the episodes you downloaded for that show, grouped by season. You can also find these titles through regular search and navigation. You will know that something is available for offline viewing if you see a smartphone icon where the download button sits. How much space do I need? The amount of storage Each title eats is based mainly on the length of the video and resolution and with other variables playing in the equation - the largest is your quality environment â € "This number may vary greatly. We downloaded three similar length and resolution movies - some of the Star Wars movies, which clocks in just over two hours each - to see how each of the options affects the file size. The empire affects the quality of standard quality was 0.92 GB for a runtime period of 27 minutes, while a new average hope needed 1.4 GB for 2 hours and 4 minutes. This is a modest jump compared to the return of the Jedi on high quality, which needed 5.5 GB for 2 hours and 14 minutes. For shows, a 39-minute episode of Mandalorian on high quality takes takes but only 270MB on standard and 424MB on average. Finally, at 3 hours, 1 minute runtime, The Avengers: End Game needs a huge 7.1GB. Using the above data, you can process an approximate estimate of how much space you need to store everything you want. You can mix and match by adjusting the quality setting before starting the download. Now it would also be a great time to set up if you need a Wi-Fi connection to download content, an option that on limited data should certainly consider. Disney+ allows you to download only Wi-Fi by default. What is available? As explained above, all in the Disney+ catalog can be downloaded for offline consumption. Whether it's an entire season of Darkwing Duck or every single Marvel Cinematic Universe movie, if it's on Disney+, you can download it. Unlike some other services, Disney+ is rather loose for restrictions. For beginners, you can download a single title on up to 10 different devices at a time, and you can download any of them as often as you want. The only thing Disney asks is that you connect to Disney+ every 30 days. How do I eliminate titles? In the end, you want to make room for something new. If you want to delete a single title or deck all at once, Disney+ makes the task deliciously simple. Step 1: Delete a single title When you want to delete titles from your device, the process is much easier than downloading files. In fact, it will only take a couple of seconds to delete something from Disney+. First, find the content by going to the download section. You can access the download area by touching the second icon from the right on the app navigation bar. Find the movie you want to delete and click the smartphone icon on the right of its title. Select Remove Download, and the title will immediately escort you from your storage. If you are deleting some selected movies or programs, this is a simple way to do it. Step 2: Clear all titles You have a few options to remove titles from your Disney+ page after they have been downloaded. Within the Download section, you will notice a Edit button in the upper right corner of the screen. Select Edit and, quickly, several squares will start popping next to each movie or TV title on the screen. You can click these squares to select a specific title or choose different content options at once. Click on as many squares as you want to delete. After making the selection, tap the trash icon to remove them permanently. In a few clicks, you can edit the library to appear as you want. If you prefer to delete all downloaded titles, click the Select All button to highlight each title. Then click the iconIf you accidentally highlight all titles, but you want to deactivate them, just touch the Select All button a second time. If you are looking for a fastest way to mass cancellation options, Disney + ago ago A function that you can use. Touch the icon of your profile at the bottom right of the screen. Then go to Settings and select Delete all downloads. This option will delete all your titles with a single click, quickly freely freeing space for the new titles you want to download.
