a clever guy. Disbanding the party was a mistake, and even though he'd made some missteps in our time together, he contributed a great deal to the group overall. Knowing what kind of man he is, I know that he must be doing well.

It's ridiculous that, even on the verge of death, I am doing something stupid like worrying about others.

I truly am a fool.
I should've known there had to be another path...I should've chosen another way...

"I still don't even have the strength to survive..."
If I am reborn, I swear I'll strive to be a hard worker. I silence the voice in my head that taunts me, claiming that I am meeting this fate because I am stupid. I rack my brain to remember the rest of my history. I mutter, closing my eyes, "What...a boring life I've led."

I hope that I can at least die in the gentle embrace of sleep.
Then a shadow falls across my face.

Online reading NET is the process of extracting meaning from a text that is in digital format. Also call from digital reading. Most researchers agree that online reading experience (whether on a PC or a mobile device) is fundamentally different from the experience of reading printing materials. However, as was said to follow, the nature and quality of these different experiences (as well as the specific competencies needed for proficiency) continue to be debated and exploited. See examples and observations ā, usless, mE160A. See also: "About reading printing fonts, reading online is 'not linear.' When you read a book or an article in impressions, you follow a reading sequence ā € ~ ~ prioria € ~ €, beginning in the text in the text and progressing systematically through the text. However, when you read information online, you often font pula in font using hyperlinks that direct yo u for a different web page. "(Christine Evans Carter, Mindscapes: Critical Reading Skills and Strategies, 2nd Ed. Wadsworth, Cengage, 2014) Comparing Experiences of Printing and Digital Reading" Certainly, when we return to reading online , the physiology of the own reading process changes; we do not read online the same way we do on paper. "When Ziming Liu, a teacher at San Jose State University, whose research centers on digital reading and e-book use , conducted a review of studies that compared Digit reading experiences AI and impression, he discovered that several things had changed. On the screen, people tended to navigate and scan, to look for keywords, and read in a smaller line. a more selective way. In the page, they tended to concentrate more on the text. The skimming, Liu concluded, became the new reading; the more we read online, the more likely we moved quickly, without stopping to stop Anyone thought. "P" The digital reading of erhaps is © necessarily worse than the printed reading. Julie Coiro, who studies the understanding of digital reading in elementary and high school students at the University of Rhode Island, found that good reading in letters is not © necessarily translate to a good on©-screen reading. Students do not differ only in their skills and preferences; They also © different types of training to stand out in each medium. The online world, she argues, may require students to exercise much greater self-control than a physical book. When reading on paper, you may have to monitor yourself once, to actually get the book," she says. On the Internet, this cycle of monitoring and self-regulation occurs over and over again. "Maria Konnikova," Being a Better Online Reader."The New Yorker, July 16, 2014) Developing New Skills for Online Reading-"How does the nature of writing and reading change on the Internet? What, if any, do we need new literacies? We are just discovering the answers to these questions (Afflerbach +Cho, 2008). First, it seems that understanding online reading usually occurs within a task of investigating and solving problems (Coiro &Castek, 2010). In a light, online reading © online search. Second, online reading© also becomes strongly integrated with writing, as we communicate with others to learn more about the questions we explore and how we communicate our own interpretations. A third difference that exists © new technologies. are used online. Additional competency is needed to effectively utilize each of these technologies. "Finally, and perhaps most importantly, reading online may require even greater amounts of high-level thinking than offline reading. In a context in which anyone can publish anything, higher-level thinking skills such as Creation of source material and understanding from the point of view of an author becoming especially important on line. (Donald J. Leu, Elena Forani, and Kennedy, Providing Classroom Leadership in New Literacies. The Administration and Supervision of Reading Programs, 5a ed., edited by Shelley B. Wepner, Dorothy S. Strickland and Diana J. Quatroche. Teachers College Press, 2014)- [E] encourage students to take a leading role in sharing their skills and strata © on line has proven to be a good medium © I am going to promote the acquisition of the new alphabetizations of on line reading comprehension (Castek, 2008). The results of this study suggest that students learn better on line reading skills from other students, within the context of challenging activities designed by the teacher. Increased levels of challenge seemed to lead students to try several approaches to make sense of complex information and encouraged them to think deeply about solving problems. "(Jacquelynn A. Malloy, Jill M. Castek, and Donald J. Leu,"Silent reading and understanding of on line reading."Revising the silent reading: new directions for teachers and researchers, ed. by Elfrieda H. Hiebert and D. Ray Reutzel. International Reading Association, 2010) Read More, Remembering less? We may have more access to information than ever, but reading things online really has a negative impact on people's cognition. "In a study carried out at the Victoria University of Wellington, New Zealand,] associate professor Val Hooper and master student Channa Herath analysis of on line and off-line reading behavior found that online reading generally does not have a positive impact on people's cognition. The concentration, understanding, absorption and recall rates when getting involved with the on line material were much lower than the traditional text. "That's right. © even though people go through more material thanks to skim reading and scanning of on line material. "(Internet makes us stupid: study."Sydney Morning Herald [Australia], July 12th of 2014) The transition to digital reading are words that are being taken on a computer screen, and for millions of It© a daily event, which now seems to them as natural as anything else in their lives. To think that millions will not be willing or will not be able to make the transition to a global experience of digital reading © not. To a large extent, people already do most of their reading digitally" (Jeff Gomez, Print Is Dead: Books in Our Digital Age. Macmillan, 2008) The Lighter Side of Online Reading "Anyway, I've done a lot of research in the past, you know, a few hours, and I've found that most people will believe everything they read. And I know it© true because, you know, I. . . I read it online somewhere" (Dr. Doofenshmirtz, "Ferb Latin/Lotsa Latkes" Phineas and Ferb, 2011)
