Version: Full update: July 29, 2022, Pokemon White 2 Extreme Randomizer, as the name suggests, is The Original because it's just a randomized version of the original White 2. Pokemon White takes place in the games two years later. In the meantime, many changes have taken place in UNOVA: new locations are now available in the southwestern and northeastern parts of the region, and some pre-existing locations cannot be visited or are limited to a later phase of the game. The introduced and ineffective Pokédex, like in Pokémon Platinum, was extended to Pokémon from other regions. What was randomized? Wild Pokemon Trainer Events Pokemon Pokemon Types/Moves/Abilities If you're interested in anime/manga recommendations, new products, and other anime content, check out our new OtakuHarbor website! Note on screenshots: These Pokemon ROMs are random in front. If you start a new game, the game will not be created again. If you don't like the randomness of the game, try downloading other files below. Enjoy! Download Operation! Credits Universal Pokemon Randomizer is a program that offers you a new experience of playing Pokemon. In the same vein as previously released randomizers, it offers a personalized game experience and lets you randomly select a lot of things: Starting Pokemon types, Wild Pokémon are found in grass, caves, and other places. Pokémon that trainers use against you. The main characteristics that determine the potential of each Pokémon. The elemental types of each Pokémon. The abilities of each Pokemon in the games where they are. Moves that Pokémon learn as they win subsequent levels. The content of each TM that can be trained teaches you to give them extra moves (the HM moves do not change so you can still overcome the game). The ability of each Pokémon to learn every TM or XM move. "Static" Pokémon that are given to you to fight in the world or sold. The names of the trainers and the class they belong to. Traffic instructor moves for games where they are important enough. Of course, you can choose exactly what is random in your particular ROM. If drawing things like Pokemon types is too confusing or awkward, you can drawVersion: Delivered completed: July 29, 2022. Enjoy! Download loans on Operation! Universal Pokemon Randomizer is a program that will give you a new experience playing Pokemon games. In the same vein as the previously randomly released, it provides a personalized gaming experience that allows you to do many things randomly - Pokemon Startup. Wild Pokemon that you face in grass, caves and other places. Pokemon that trainers use against you. The main stats that determine each Pokemon's potential. The basic types of each Pokemon. Every pokemon skill in the games where they exist. Moves that Pokemon have studied gain levels. The content of each TM you can teach a Pokemon to provide additional moves (HM moves don't change to ensure you can still beat the game) for each Pokemon's ability to research each TM or HM move. A "static" Pokemon that is given to you is fighting in the underworld or being sold. Names of trainers and businesses they belong to. Moves taught by game teachers were relatively significant. Of course, you can choose exactly what is randomized in your particular ROM. If the types of random pokemon are too confusing or annoying, it can be randomized to your specific needs. Why are you using this random receiver? It's universal. All major Pokemon games released in the US are supported, from red to Czarny 2 and everything in between. You can easily generate the same random game. An important part of Pokemon is competition, and racing with friends to play a random game can be a great experience. If you send multiple parts of the text or a small file, you can be sure that everyone has the same game and you don't have to send the whole Roman memory every time. This is meticulous. This random buyer paid enough attention to the details so that the obsessive parts of the original games probably don't show up. For example, trainer random poker will suddenly use moves rewritten in the first game - completely obedient (accidentally or not) to the moves given to them. There are little things he does to have a better experience. By randomly sharing Rome, you can adapt small improvements that will most likely be nicer in the region where you will be playing a randomized game. This includes a change to modifications that no longer require a trade (so you can get a powerful Pokémon), and to allow the National Dex to search for Pokemon at the beginning of the game, the unsafe .
