Today's universities are at the forefront of technological advancement, and greater access to technology can result in a more valuable university experience. Whether a university is creating the next wave of technology in its labs and research centers, or using it every day in its classrooms, university campuses are proving to be some of the most advanced places in the world. High-Resolution Budget Methodology As part of our search to find schools that will offer students the highest educational value, we are naturally curious to know which schools are in these high-tech schools. To find them, we consulted university websites, reviewed national surveys of university students about their schools, searched various databases on topics such as computer science, biometrics and social media, and analyzed the winners of prestigious national awards, such as the Innovators Awards. While we realize that the system is not perfect, we needed a useful way to help readers compare characteristics between these various high-tech universities. The points system that we developed is explained below. Awards2 Points: Major award (national or international) for technology or innovation1 Point - Regional or local award for technology or innovation Additional criteria 1 point - for declared 10,000 square feet of laboratory or specific research of the subject. "Research facilities or departments that allow the opportunity for research to study undergraduate students. Point" Nobel laureates on campus or who are listed among the student point), the offering of technical features beyond traditional universities, whether in classrooms, residencies or department. After reviewing several hundred candidates, we believe that these fifty They're the best. They are ordered according to the points awarded, at least to the greatest. In the case of a tie, the editors used their discretion. 50. Wofford College (2 points) Spartanburg, South Carolina, U.S.A. Website While Wofford College College the most common computer connections, cable connections in their living rooms, and Wi-Fi for their students, make this list because of their unique site called "FYI: First-year Interface". Almost every beginner creates a profile on the MySpace site to share profiles, photos, bed hours, party habits and any other useful information about themselves. Students who become friends through FYI then have the opportunity to become roommates once the school begins. 49. Athabasca University (3 points) Athabasca, Alberta, Canada Website Athabasca University is a world leader in distance education. In fact, in Athabasca all teaching, learning and administrative functions are performed in virtual space, or "Open Knowledge Environment". In order to advance towards its goal of becoming a fully online virtual organization, Athabasca created systems for virtualization of desktops, synchronized web conferences, research collaboration, a mentor portal, course content management, online evaluations, student program planning, and more. Athabasca now has more than 38,000 students from around the world, and was the winner of the Innovative Leadership, Governance and Policy Award for Campus Technology 2012. 48. University of Missouri - Columbia (3 points) Columbia, Missouri, U.S.A. Website Columbia has also implemented Tegrity's conference capture software in classrooms. This software allows the University to capture course conferences including slides, audio, video, document camera activities, instructor pens and interactive boards. Students can access recordings via Internet, iPods and iPhones (which every Columbia student should have), or other mobile devices. Later, students can search for any word or phrase in class. With Tegrity, Columbia classes and lectures are available 24 hours a day. 47. Hamilton College (4 points) Clinton, New York, U.S.A. Web Hamilton College New York has a computer for student students of almost a computer for every two students — one of the highest in the United States. For those students who wish to bring their own computers to the campus, Hamilton has serious needs in terms of which computers will be able to connect to Hamilton's extensive Wi-Fi network. Technology and engineering are very present on Hamilton campus, and companies like IBM, Google and Apple have recruited recent graduates. 46. Colgate University (4 points) Hamilton, New York, U.S.A. The Colgate website, a private university of liberal arts located in New York, was one of the first colleges to introduce an independent computer science program. Colgate's Computer Science Club has also had the unique honor of hosting Google Code Jam, an international programming competition through which Google identifies engineering talent for potential employment. Although Colgate is known as a state-of-the-art university in terms of technology and engineering, the University still receives all its electricity from the hydroelectric power generated by Niagara Falls. 45. University of California San Diego (5 points) San Diego, California, USA Recipient of the Innovation Challenge Award, University of California San Diego is one of the most technologically advanced campuses in the system of the University of California, something convenient considering the most popular of the University are science and engineering schools. Regardless of the importance, UCSD students have access to the state of art, user-centred engineering library. As California's main library south of Los Angeles, the library serves as an important intellectual resource both for students and for the region's biotech and corporate communities. The library helps more than 450,000 guests in person and more than 173,500 guests online each with all patents and scientific information, to help with more than 3,000 e-journals and thousands more e-books. 44. Pomona College (6 points) California, U.S.A. Website Pomona is one of five universities that make up the Claremont College system (see also © n Harvey Mudd in this list). Pomona students have access to all facilities, programs and resources of the other four schools, and also © n can participate in the Program in Science, Technology and Society as a concentration or specialty. The unique program includes courses to "practice cientÁfica and tecnolÁgica" and three courses of concentration on a specific topic of science and technology chosen by the student. 43. University of Richmond (6 points) Richmond, Virginia, USA Homepage entire campus of the University of Richmond is wireless, which is good since 85% of university courses online they include a component that allows students to share documents, notes and other class materials. Unlike many other universities, the support technician TA © Richmond offers a diagnosis tea © Free technician on campus for student computers. For students without a computer, Richmond has a computer-to-student ratio of 1: 3. As a bonus, Richmond students can enjoy free cable TV in each of the residences of the University. Harvey Mudd College 42. (6 points) Claremont, California, USA Homepage Specialties Sciences and Engineering computation of Harvey Mudd College complete their degrees with a closing course known as A "CiÁnicaÁ." over the course of a year or ±, students work in industrial laboratories and research to complete a product for an external client. Recent student projects have included a proton accelerator for the A Lamos National Laboratory, video surveillance applications for The Aerospace Corporation, and a system of recommendation of music for Fox Interactive Media / MySpace. 41. TA © cnica University of Dortmund (7 points) Germany The Technical University of Dortmund is a university highly qualified for its performance in the fields of physics, electrical engineering, chemistry and economics. Dortmund has particularly strong programmes in and artificial intelligence, and the University's robot soccer team, the Dortmund Droids, were world champions at the Cup Vice RoboWorld 2002 and third in 2003. Dortmund's students also have studies abroad and opportunities for collaboration with Dortmund's many partner universities in the countries of Europe, Asia and North America. 40. Utah State University (8 points) in Logan, Utah, Utah State University website, students don't take notebooks, or even laptops, to class. Instead, state of Utah employs a Smart ClassroomsÁ equipped with Panopto conference capture technology. The University also collaborates with smart furniture companies such as Steelcase and Izzy + to maximize the design of their smart classrooms. In fact, in an attempt to foster a collaborative environment between students and teachers, Utah state now refers to rooms not as classrooms a, A, but as a pod.Á 39. Ben Gurion University of Negev (9 points) Beer-Sheva, Israel Website Ben Gurion is one of the most important centers in the Middle East for teaching and research. The University is a leading partner of the Massachusetts Institute of Technology. In addition to a 15-week summer exchange program for students from both campuses, the two schools have now implemented a joint seed fund to encourage collaboration in research. Ben Gurion has eight research institutes, such as the Ilse Katz Institute of Nanotechnology, Science and Technology and the Edmond Safra J Center for the Design and Engineering of functional Biopolymers. 38. University of Massachusetts A Boston (10 points) in Boston, Massachusetts, EE University Massachusetts Web Site, the Single Public University Bostona s, put into practice a unique toolkit that allows students with vision orto participate in hearing classes. The initiative began when a blind and deaf student enrolled in online classes. The University, which at that time could not accommodate such a student, repliedÁ system in which a professional subtitle writer transcribes the classroom's live dialogue and sends the subtitles to a mandible screen reader and a Braille keyboard. Currently there are several blind and/or deaf students who take classes through the university. 37. Brigham Young University (10 points) Provo, Utah, U.S.A. A SEAL Brigham Young University (BYU) goes to great lengths to emphasize mentoring and research opportunities for its undergraduate students. Teachers have strong incentives to make money with technical innovations, and are offered 45% of the gifts, creating a wide opportunity for students' research positions. In addition to a technology transfer office, BYU has a creative works office that administers licenses for software, videos and instructional materials created by BYU, among other things. In addition, BYU is consistently ranked near the top of the list for the number of patents applied for. 36. The Rochester Institute of Technology (11 points) Rochester, New York, U.S.A.A. SEAL Founded in 1829, the Rochester Institute of Technology (RIT) sets itself apart from other institutes of technology by focusing on vocational education and experiential learning. RIT RIF RAIGE THERFER ANDERANTE among the school companies they prefer when

transdisciplinary study is key to its The University has also established additional research centers at universities in India, Indonesia, Italy, China and Korea, which offer study abroad opportunities to its students and intercultural research capacity to its researchers and faculty. 34. Wake Forest University (12 points) Winston-Salem, North Carolina, USA Website The student/computer ratio at Wake Forest University is 1.08 to 1, one of the highest in the country. As if that wasn't impressive enough, the University of North Carolina also has the "Wake Forest Campus Life", an app that updates 24 hours a day and keeps students, teachers, and parents connected to what's happening on campus. To access the app, students have the advantage of an extensive Wi-Fi network in all campus buildings and residences. Recently, Google awarded the Computer Science and Physics departments of Wake Forest a grant to organize computer workshops for local schools. 33. Delft University of Technology (15 points) Delft, Netherlands Website Founded in 1842 by King William II of the Netherlands, the Delft University of Technology, or TU Delft, is a well-known research institution. TU Delft hosts more than 3,300 scientists and 2,200 support staff at the University's many research institutes. These research institutes strive to combine education, training, and cutting-edge research opportunities for graduate students, doctoral students, and postdoctoral researchers in a variety of fields. 32. Australian National University (16 points) Canberra, ACT, Australia Website The Australian National University (ANU) has two Research Schools within its Faculty of Engineering and Computer Sciences. The research groups led by and teachers include Algorithms and Data, Applied Signal Processing, and Computer and Robotics, and most of the students and staff also have the innovative ICT program designed for learning entrepreneurial skills in and the techniques. The program consists of a series of workshops and seminars, and hands with business development and innovation. 31. University of Tokyo (22 points) Bunkyo, Tokyo, Japan Website The University of Tokyo is a world-class research university with five campuses throughout the Tokyo region. The university is home to a series of research laboratories, each of which is segregated by the age of the students who use it, a good benefit for those students whose class status would limit so that their laboratory. Considered to be Japan's most prestigious university, TODAI is the highest in Asia and 21 in the world according to the academic classification of world universities. 23. Academia de la Universidad de Arte San Francisco, California, U.S.A. (23 points) Website This San Francisco-based university offers 23 different art and design schools that go architecture and advertising to fashion and web design. Almost all schools are in their own building throughout San Francisco, and offers their students access to cutting-edge equipment, software, recording recording/Film sets, and just about anything else that students need to study at the industry level. All computers are leased and replaced every two years to ensure students are using the newest equipment, and each school (run by professionals from the labor industry) strives to maintain their equipment and teaching six months before their respective industry. 22. University of Washington: St. Louis (25 points) St. Louis, Missouri, U.S.A.A.A.A. Website The University of Washington has taken on the task of integrating technology into all aspects of campus life: academics, research, and administration. For those interested in it, the Department of Computer Science and Engineering offers students more than 80 courses ranging from business ethics to team building, to finance and intellectual property. Although some Washington students complain about high internet rates and access to television, a high-speed campus network connects all of Washington University's campuses and provides easy links to the Internet2 and Lambda's national research network. The university also has a large collection of electronic journals, and provides access to the university's computerized library services, through which end-users can conduct electronic searches of the University of Bologna's catalogue, as well as other national catalogues. The university library contains several million volumes and provides access to the best in scientific and from all over the world. 20. University of Sussex (29 points) Brighton and Hove, England, the UK Website The University of Sussex considers that research is at the heart of its academic activity. The EI is on track to meet its goal of doubling its research revenue to £54 million, and creating three new interdisciplinary research centres. World-class research is carried out at the Sussex Schools of Business and Administration, Education and Social Work, Engineering and Computer Science, Life Sciences, Mathematics and Physical Sciences, among others. 19. University of Toronto (31 points) Toronto, Ontario, Canada The University of Toronto has become the new focus not only for those from the tech world, but also for prospective students interested in technology and Artificial Intelligence. Professor Geoffrey Hinton recently founded an artificial intelligence company incubated at the University before being acquired only in its first phase. Another professor, Steve Mann, has made significant progress with his smart devices known as "portable technology". The University of Toronto has become synonymous with the idea of innovation in recent years, and has produced ten Nobel prizes to prove it. 18. Nanyang University of Technology (34 points) Singapore Website Nanyang University of Technology (NTU) is a research-intensive public university with 32,500 students (both undergraduate and graduate) and four faculties, including Engineering and Science. NTU's Faculty of Engineering has a research production among the three universities in the world and is the fifth most in the world, while the Faculty of Science has an award-winning faculty and world-class laboratories. The University is also home to several world-class research centers, including the Center for Advanced Materials, the Center for Nanotechnology, and the Center for Robotics and Automation. The University of Michigan is the oldest university in the state and the only public research university. With the vanguard technology of many of the MA e a e e a e e a e e it is not surprising that Michigan students enjoy a plucker of technological advances that facilitate their lives on campus. In addition to the usual IT services and the wide Wi-Fi network available throughout the campus, Michigan students have cloud storage, access to more than 2,500 computers and Windows and Mac printers, and security software is free. They can also use the online directory of the community to find contact information from anyone in the Michigan community. 16. Technische Universität "Aifan" München (TUM) (37 points) München, Germany Technische Universität "Aifan" München (TUM) is one of the best universities of Europe. In fact, it was one of the first universities of Germany to be appointed University of Excellence. TUM has multiple corporate research centers in which students can carry out research regardless of the faculties in anything, from life sciences to neutron physics. With its "emerging field of research", researchers and teachers of TUM are dedicated to discovering new ways of advancing society. Organized according to the highest international standards, it is not surprising that TUM was also ranked by the International Shanghai Ranking as the best German University in 2011, 2012 and 2013. 15. Princeton University (54 points) Princeton, New Jersey, USA Website by donation per month, Princeton is the most rich university in the world, so it is a place of opportunity for ambitious students interested in science, technology or investigation of any kind. The newest building on the campus, the Quimica Frick laboratory, is an installation of last generation technology, and is the most modern and expensive building in the world. It has 56 points, and is the most expensive building in the world. The University of Michigan is the oldest university in the state and the only public research university. With the vanguard technology of many of the MA e a e e a e e a e e it is not surprising that Michigan students enjoy a plucker of technological advances that facilitate their lives on campus.
