Rilevatore autovelox per android

Navigatore per android con rilevatore autovelox. Rilevatore di autovelox per android gratis.

LÀ € à € º use of autovelox apps, controls and traffic alerts for mobile phones are all € à € º agenda. In this sense, it is not a doubt that technology has always been a great pilot ally. Ask your parents or friends if not what they have tried when they discovered the GPS on the street, or if you are a bit € à € € œmle and bold, tell me what you think of evil radar detectors (who at all € À € º Today I think they are still illegal, by the way). Android by its part also contributes with its small grain of sand to the case, and offers a quantity commendable app for drivers who alert and indicate controls, radars and possible accidents or accidents on the road. These apps are nothing but small social networks of drivers who leave notifications on the relevant accidents who are viewing while they are at the wheel to alert other drivers. The apps that alert the presence of radar and roadblocks are legal? While I was documenting me for this article, I came across several comments from users who wonder how far LÀ € à € º use of apps that warn you of speed cameras and traffic controls can become legal. Most of the doubts focuses mainly on the alleged illegality committed when the drivers are informed of the location of road radar. Quite right? Currently and according to the current legislation in Spain: not declared illegal that an app alerts police controls. As reported by Automovilistas Europeanos Asociados (AEA), it is completely legal that drivers feel the position of the radar or controls to other users via mobile © This information is obtained from the personal observation. Apparently this type of app are not very fun to the forces of the Order and the Civil Guard who carry out the relative road checks, since logically they feel reported when you make your location and any risks that there is fâ² can lead to. The 10 best autovelox apps and traffic alerts for Android therefore, although the applications we will examine below are highly reliable, it can always be a small percentage of false notices or alarms provided by state security forces to perform a small boycott (which for now seems to not work according to the comments of users of these applications). Read: AÀ Recognize songs Online without download - MovilfitÀfà It is important to remember that you, € à € º à € º use of this type of radar application can distract the driver. Always use them responsibly. Google Maps for a few months, Google Maps incorporated LÀ € à € º speed camera warning as additional functionality. Being there € à € º popular navigation app on the planet, if you use it already to travel and you don't want to install additional applications on your Android, this is one of the best (and even free) options that You can currently find to be aware of the radar fixed and mobile phones during the journey by car. A function that is maintained even thanks to its vast community, which allows users of the application to update radar in real time. Waze very few apps can afford to say more than 100 million downloads on Google Play and Waze is one of these. ÁfÀ IÀ € à € º app for traffic and browsing the world's largest community. It tells you the best routes to get to your destination before, alerts and accident checks and also tells you how long it will take to go home. It also informs you about interesting details like what are the neighboring service stations with the lowest prices a wonder, no? Social Drive This app is a small large social network, where drivers add relevant warnings to share them with other users from SocialDrive. Once the localization service of our Android device is activated e In which we are selected just go to Á € à € € œAvaVisiÀ € à € à € À to see all the notices for controls, radars, accidents and inconveniences. For each notice, if we click on it we can see if more drivers have verified LÀ € à € º notice (ie, it is not a fake notice) and if we are going through that € à € º area we can confirm that LÀ € à € º notice is still valid or indicate that the notice is already disappeared. It is a very useful app with more than one million downloads on Google Play and a 4.2-star rating. Unfortunately it is only available in Spain. RadarBot: Radar Radar detector RadarBot is another radar detector that combines real-time alerts with GPS radar detection. Show daily updates on mobile and fixed speed cameras thanks to the alerts reported by the users of the application of the application. Also advise radar in the galleries, section radars, cameras at traffic lights and dangerous points. The radarbot app has other interesting features like these: warnings in the direction of travel (excludes radar in the opposite or off route). Sound warning when we approach a radar. WARNING In the event of exceeding the speed limit. Model vibration for motorcyclists. Read: AÀ The 10 best DLNA streaming apps on AndroidVa noted that € à € º application is downloadable for free, but you have to pay 5.99 euros to unlock all the functions. Intelligent driver This is an application with double utilities. On the one hand it warns us about radar and traffic controls, but also acts as a video recorder or DashCam for the car. Notify the presence of speed cameras, traffic lights with photo-red, radar that monitor exclusive lanes (public transport), section radar, radar that chase from behind, fixed police controls (Garitta) and police or radar controls. UnÀ € à € º App that is emerging a lot in the Play Store, with an average rating of 4.5 stars and more than a million downloads. Glob Á € à € à € œGPS, traffic and radar Glob ÁfÀ` UnÀ € à € º other autovelox app and very popular traffic for Android by community. With over 1 million installations and unÀ € à € º clean and clear interface based on material design, this application has everything you need: Live routes with real-time information, fixed autovelox warnings and updated furniture instantly , notification of stops and how to avoid them, navigation with voice guidance and much more. However, we can actively report accidents and controls from € à € º application only by driving with open glob, we will then share useful information about the traffic of our area. Radardroid one of the first apps to arrive for Android and a true classic. Report the position of the radar and has a large database of many countries (I have not counted one by one but I would say that they are all or almost). The Lite version is free and highly recommended. Radardroid also works in the background, which means we can use our Android phone to listen to music or any other function. When we are close to a radar or a mobile control we will receive a vocal and visual warning with the notice in question. Although it has been present in the Play Store for many years, it continues to constantly receive updates. LÀ € à € º ultimate, less than a month ago (18 December 2018). Camsam Another radar alarm device, and this also with a huge database of over 60,000 fixed radars around the world. It will automatically update every 5 minutes and has sound alerts so you can leave the phone in your car and will notify you when you have a nearby radar. Very well thought to minimize distractions while driving. It also includes mobile motorhome alerts, overview mode by tilting the mobile phone of 90 º, Widget mode and support for HFP-Bluetooth. Read: AÀ SP Flash Tool: Tutorial and Basic Guide Coyote: Speed cameras, GPS and traffic This radar detector, although for payment, has one Very specific that it distinguishes it from others: your active user community. Despite the 6 euros which costs the subscription more than 3.5 million users who report the position of radar, accidents or inconveniences in real time. Believe me, if you pay 7 dollars a month and it has so many users, I just want to think that it has to work somewhat or yes. The first 15 days of trial are free. Among all the information provided includes fixed and furniture radar, stage radar, traffic light radar, belt cameras and mobile phones, traffic jams, slow traffic, moderate traffic and brusque braking. As for road safety, we will find information on speed limits on each section, notices of stop vehicles, works, objects on the road, visibility reduced, dangerous weather conditions, etc. TomTom Autovelox LÀ € à € º App TomTom is highly appreciated by the Community (score of 4.4 and over 1 million downloads) and between its functions CÀ € à € º ÁfÀ` that of reporting radar Fixed and mobile and sections at the controlled average speed, as well as unganging. It has a community of over 5 million users who share and ratify information and has a coverage for many countries: Spain, Italy, France, Mexico, USA, Argentina etc. App which also has a premium version for a fee, and that has many functionality: detection of fixed radar, mobile phones, traffic lights and tunnels, night mode, voice alerts or vibration (if we go to motorcycle), mode modalitÀfÀ Compass and satellite / hybrid / road display. So far it seems that users have complained about the fact that the database was not updated, but has just received a new update at half April which should solve the problem of Á € à € œRiteAA € à € à € à €. After examining all these apps IÀ € à € º unique thing that is completely clear to me that at least as regards the legality of the position of the radar is not there € à € º ÁfÀ ÁfÀ` Very from scratch. We have already seen at € à € º à € º à € º à € º article as is completely legal that drivers feel the position of radar or controls to other users as long as they see it for direct observation (ie without using detection devices). I understand that other applications like SocialDrive or Waze can punish a little € à € à € à € œThe Order forces Although the excuse of terrorism can certainly be justifiable, it is still a vain attempt to try to put the doors in the field. What do you think? think?
