Source: Disney Not One, But Two Star Live-action Movies Of Rudyard Kipling's Tale Collection The jungle book will be released in the next two years, with Warner Bros. bot that the audience will want to see the exact same story with a different cast only a year after Disney releases its rereading of the story on a young boy raised by wolves in the jungle. Disney, who created the famous cartoon version of The Jungle Book in 1967, is beating Warner Bros. To the punch. Disney's Jungle Book is directed by Iron Man director Jon Favreau and is intended to go out in October next year. Warner Bros.' The Jungle Book: Origins is directed by Andy Serkis and is set for a release of October 2016. Both films are characterized by a cast of great fame for the vocal roles of the various animals that interact with the young Mowgli, who are raised by wolves after being orphaned and abandoned in the Indian jungle. Both films will use a blend of live-action and CGI. The Warner version recently announced its cast members. For The Hollywood Reporter, Andy Serkis will voice Baloo the bear as directed, Christian Bale will give voice to the fierce but friendly Bagheera panther, Benedict Cumberbatch will be the evil tiger Shere Khan, Cate Blanchett will be the python Kaa, and Naomie Harris Nisha, one of the wolves that lifts Mowgli. The boy will be portrayed by the young actor Rohan Chand, who will appear in the film. Chand acted next to Jason Bateman in Bad Words. As for Disney, Bill Murray double Baloo, Ben Kingsley is Bagheera, Christopher Walken is the orangutan King Louie, Scarlett Johansson is Kaa, Lupita Nyong'o is the mother of the Raksha wolf, and Idris Elba is Shere Khan, according to Deadline. The newcomer Neel Sethi will play Mowgli. The story behind the scenes on how both adaptations ended up being made at the same time is unknown, but probably both studies ended up putting down the money and decided not to go back from making the film. The original Disney film deviated from the novel with view of the dark tone of the book, but was acclaimed for its great soundtrack, animation and vocal cast. Disney made a live-action version of The Jungle Book first. The 1994 Rudyard Kipling Jungle Book has John Cleese in it and got decent reviews, with a 92 percent fresh rating on Rotten Tomatoes, alsoOnce again, Disney was criticized not to stick close enough to Kipling's work, despite the use of his name in the title. Whether it's Disney Disney deciding to stick to the starting material this time is uncertain at this point. The idea of two movies about the same thing coming out at the same time isn't new, but it's far from desirable for the studio movie that gets the best cast or comes out second. Just this year, there have been two different Hercules films telling the story of the demigod. Dwayne's Hercules "The Rock" Johnson stole the thunder of "The Legend of Hercules" with Kellan Lutz of Twilight released earlier this year. While Hercules doesn't perform spectacularly with critics or at the box office, she beat her rival Hercules using the power of rock star. Both adaptations of the Jungle Book have the most prestigious cast a director could dream of, so Warner Bros. won't stand out by eliminating Disney. The most likely scenario is that The Jungle Book: Origins will attempt to become dark and sharp, precisely erasing much of the healthy family fun Disney is known for, reproducing the dark side of Kipling's stories. It remains to be seen whether this will persuade viewers to pay to see essentially the same movie just a year after Disney's release. Given the title, maybe Warner Bros. should promote the movie like it's a Disney sequel and end it here.
