A huge literature makes thereĀ² which can put
the phenomenon in meaningful words. Click here for general information about this book, the Gnostic Apostle Thomas. For the moment we are only concerned with its use of the two-unit pattern. The ingenious interpretation of the combined texts was designed to reconcile the two creation stories in Genesis, and to aim for a monogamous morality: the
two sides, the man and the woman, had been and should be again, in marriage, a flesh. Eros and Androgynes It is often said that unitive or mystical experiences cannot be described in words, because the phenomenon lies outside the rational system of language. It can be seen. According to Cassianus a saying of the Lord to Salome - that "death will
have "power" until women bring children - it meant that the kingdom would come when you stepped on the head of shame and when the male and female become one. There was an overcoming of the division of the Adamic Man-Woman in Eden, which was the beginning of the differentiation, and the restoration of the UnitĀ as a result of their meeting.
Tantric Buddhism, a mystical system in which the word "love" Ā was explored to the fullest, offers the yalyum, united figures of the male god who embraces his female counterpart, keeping her close before him, face to face, body to body. Click here to return to the contents table. And others make it a doubt, like Thomas himself: He is said to have
asked for a tactile proof, touching the relevant parts, that the Mother of Jesus' was still a virgin after giving birth. GesĀ' then invites questions, to which dĀĀ broad answers. And for him the way to human reunion with the unitĀ it was through a strict reason and virtĀ', without gnostic shortcuts. ('Androgyne" The term for this symbol of the Union, ocisif
ocisif li noc anosrep anu ,atidorfamre" noc osufnoc eresse ebbervod Of both sexes, even if writers do not always do this distinction.) In many gnostic systems the anthropus - an eone in the plleroma, one of the attributes of the ultimate unit, the ideal of land human beings - was considered an androgynous. And the first Christian Eresiologyists accused
the gnostic leaders of seeking women, those described by heresie hunters as weak and naive, as easy to convert. According to subsequent medieval Jewish mystics, weddings are made in heaven; Every soul, originally two sexes, is divided to birth, and it is incomplete until it finds its missing half. It was suggested that it was excluded because
subsequent writers disapproved the various Christian groups that invoked her as an authority for what had become, to their eyes, a doubt doctrine. And many of the gnostic myths had an extravagant plethora of eons, powers, arches and other intermediaries between the highest and the human while, for Plotino, the descending chain from the one was
simple: after one, universal intellect or nous, Then soul, then human. And so it was his first earthly manifestation Ā Ć the first human. The so-called Gospel of Filippo (one of the Gnostic texts, probably Valentino, found in Nag Hammadi) says that light and obscurities, life and death, right and left, "they are one of the other, are inseparable". The central
message of the Gospel of Tommaso appears in saying 22 and the other loggia that the ring changes to the theme of the "two-becoming-one", looking back towards the androgynous unit that existed before the diversity found in the worldly creation. SalomĀĀ (not to be confused with the princess who asked the head of John Baptist) and Maria Maddalena
were confident of this kind. We cannot define mystic; We can only point to it. . Porphyrio, follower and biographer, reports that Plotinus had four mystical experiences during the five years in which Together (and he says he himself had one etĀĀ 68 years). Some, who agree that the theme of "becoming one" is at the center of the Gospel, consider it
mainly as part of an early baptismal rite. When the soul has reached this height, there will be no longer a duality, but a two in one; as long as the presence remains, in fact, the distinction disappears: ĀĀ as a lover and loved here long to merge, in a copy of that union; the soul now no longer has any sense of being in the body. GesĀ' responds: "When
you make the two in one, and when you do the inside as the outside, and the top as the bottom, and when you make the male and female in one, so that the male will not be male, and female will not be female: . Something went wrong. It is said that inactive moments share some or all of certain characteristics: a feeling of being united with
everything; intense awareness, without awareness of any particular thing; a sense of knowing what ĀĀ really, what ĀĀ really ; a paradoxical state of fullness but emptiness, of taking everything and still nothing, of awareness of the connection of all things; a loss of self-interest; intense euphoria or ecstasy. A version of the old Greek translation
(Septuagint) of Genesis reads: "The male and the female created him " instead of the familiar "them." In the 1st century AD some Jewish writers combined this reading with two other scriptural passages: one speaks of the formation of the Lord "me back and forth"; The other, from Genesis, says "the Lord God. The main attack of the Gnostics was to
move away from the ancient Greek philosophical teaching of Plato and his followers. Thirty-nine of the forty-six questions were from Magdalena. Magdalene.
