No crowding around a clock in time. Lost a fist and need to correct it, you can also do this. Most day on a basic day needs readily and easily accessible and available in one place. WhatÃ € s does not like that ..... sure to say, if you work for the company youÃ € is necessarily needing to use both web services or the directly,the application in sÃ € is easy to Use, well designed, maintained well, and the overall feature of the app is something that is expected of the company. There are many features with this application and one of the main problems !!! Almost all societies collects data on individuals, ita s people so common thinks rarely on it. Much less worry about what is harvested anymore, Where this data goes, or used for. Cana t Give my personal opinion on these things. I can only say that data collection or shouldnÃ € T position collection be a compromise for convenience. Or should I say permitted by this or many other applications without a clear and understandable request of what exactly is used for that. App is awesome very useful. BUT!!!!!!!!!! To be property the richest man and the world's largest presale company. Employees associate S should be able to talk to a person, not a virtual chat bot to get individual help. Especially when many say they have been fired due to the Repetitions sometimes forget or is not thrown. I almost lost my position because I follow the direction when my wife had Covid. I received a message that I said that I abandoned my last 3 shifts and was finished. After running in the Kwbi center, taking my paper work, they found my case. But the person per person seems more respectful. Clumsy User Interface but I can grasp changes without problems so I'm happy. Another of those "apps" is just a wrapper for web pages, so expect that most cards have load times and winky behavior from the back button. I don't like that you can't see the previous movements more than a few weeks back you too can see that part of the calendar, he had to talk to HR to make sure my shifts were counted. I am also annoyed by this new tendency of red notification points that cannot be disabled. With the loading of the page and long animations, even if it doesn't take to clarify them, it takes more time than it should, which is "the time is not at all". But I'm glad this app exists and that signature for shifts is so easy. It makes the value of work.
