Lowrance elite ti2 hdi 7 in gps fishfinder

Lowrance elite-7 ti2 hdi gps fishfinder.

Automatic translation Original description available here The Elite-7 Tià 2 HDI Transducer (ROW) offers popular premium features such as an easy-to-use touch screen, Active Imaging Sonar, FishRevealâ¢Â¢, wireless networks, creative Genesis Live real-time maps, wireless connectivity and smartphone notifications are all at a more affordable price than other fish finders/plotters in their category. With the Elite-7 Ti2, you get more advanced fish location and connectivity features without the premium price. From high-detail active images, FishRevealâ¢, Genesis Live real-time mapping and increased screen clarity and target separation to features that make your water life easier, such as an easy-to-use touch screen, wireless networks, smartphone notifications and arcing engine integration Trawl/Power Pole® "Elite Ti2 was designed to help you find fish more easily. With the Elite-7 Ti2, you get more advanced fish location and connectivity features, without the premium price. FishRevealâ¢, Genesis Live built-in real-time mapping and enhances screen clarity and target separation with features that make your life on the water easier, such as an easy-to-use touch screen, wireless networks, smartphone notifications and Elite Ti Engine/Power Pole® integration 2 was designed to help you find fish more easily. Active I The 3-in-1 sonar (CHIRP, SideScan and DownScan) and 2-in-1 sonar (SideScan and DownScan) take the performance of the Elite-7 Ti2 Fish Hunt to a new level, offering greater resolution, clarity and contrast in a range unparalleled for any angler in its category. The Elite-7 Ti2 offers more powerful navigation features with a preloaded C-MAP Easy Routing + Navionics® Autorouting* World Base Map (Requires Navioincs Subscription) and Genesis Live Mapping in real time. If you prefer to create your own maps of Favorite fishing place or a lake without detailed mapping, take advantage of take advant Elite Ti2 Wireless Redes allows you to share Sonar, Waypoint and Road Data wirelessly between the TI2 show, eliminating the need to run Cable. With a new smartphone notification capability incorporated in Elite-7 Ti2, you can keep your eyes on the fish and never miss another text or call; or disable notifications for uninterrupted fishing. Peatures: Active images "\$ 3-in-1 (Chirry / Sidescan / DownScan) Ready.- Active imagining" \$ 2-IN-1 (Sidescan / DownScan) Ready.- m-mapâ ® Génesis en vivo. ® y más) .- SolarMax Touch Screen "easy to use, 7-inch high resolution. - Integrated wireless connectivity.- Sonichubâ®2 compatible.- NMEA 2000® Engine support.- Improved surface clarity allows you to see more fish targets near the surface. : - SOL PROTECTION CAP: power support s of the Lowrance manufacturer. Select one of our electronic categories and discover the range of electronic products we have for your favorite activity like Lowrance Elite-7 Ti2 HDI with transducer. To remove any doubt, contact our team by phone or email. Don't wait any longer! Click on the link below for more information about: Specifications Click on the linkLink for more information about: Manual Size Chart GPS:10 Hz, Internal Maps: C-MAPUS InlandBasemap, Genesis LiveNMEA 0183, NMEA 2000, Ethernet, Wi-Fi, BlueTooth7Â" Diagonal800V x 480HColorLED Backlight Elite-7 Ti2 is a of the units released by Lowrance for 201 9 years The unit itself is very similar to the old Elite-7 Ti, but includes several additional new features, such as Genesis Live and an Ethernet port. Like most Lowrance units, the Elite-7 Ti2 is available in several packages with different transducer (only for 2D CHIRP and DownScan) and the U.S. Inland base charts. Key Features and Specifications Display: diagonal 7â3, 800H x 480V resolution pixels, WVGA TFT color, with adjustable LED backlight Sonar: Active Imaging 3-in-1 (2D CHIRP/DownScan) Frequency and coverage (with transducer included): 2D CHIRP: 83 kHz (52°) / 200 kHz (22°) DownScan: 455 kHz (56°) / 800 kHz (32°) Depth capacity (with transducer included): 2D CHIRP: 1,000â2 (305 m) DownScan: 350¢ (106 m) Output power: Max 500 Watts (RMS) Power voltage: 12 VDC (10.8-17 VDC min-max) GPS: 10 Hz internal, 16 channels Maps: C-MAP Base Map Inland Routes, Waypoints, Tracks: 100; 3,000, 100 (10,000 points per track) Sonar and Transducer The Lowrance Elite-7 Ti2 has 3-Sonarin-1 active images, which means it is compatible with traditional 2D CHIRP, DownScan and SideScan images. However, as we mentioned above, it is the package 000-14 634-001, so the unit comes with the Mid/High HDI transducer, which only supports 2D CHIRP and DownScan. To use the SideScan image, you will need the new Active Imaging 3-in-1 transducer or the TotalScan transducer and includes a support for transom and a support for drag engine. d 83/200 kHz for CHIRP 2D (the CHIRP intervals are not specified), while for DownScan, it is capable of 455/800 kHz. The unit itself also supports 50 kHz CHIRP transducers, in case you need to scan larger depths. For the traditional 2D sonar of the unit, the included HDI skimmer uses conical beams. Its coverage is approx. 52° @ 83 kHz, and 22° to 200 kHz. The maximum depth capacity for 2D is approx. 1,000â s 2 (305 m). For DownScan, this transducer uses thin beams, only 1-2° prow, but wider side by side. Its approximate coverage is 56° @ 455 kHz, and 32° @ 800 kHz. In addition, the maximum depth capacity that DownScan beams can reach is 350â2 (106 m). The unit offers a wide range of standard sonar features. To begin with, it has the new FishReveal feature. FishReveal brings all fish arches detected by the 2D sonar to DownScan Imaging. Therefore, it allows to easily see fish in relation to the most detailed structure, vegetation or background. Overlay DownScan still available with this new unit. This feature is different from the FishReveal mode. When used, the 2D sonar panel expands and includes basic DownScan options. The probe feature list doesn't end here. The drive memory or on a memory microSD card. And among other features, we can count A-Scope, Fish ID, Circular Flasher for Ice Fishing, Bottom Lock, Depth Alarm, and more. Navigation characteristics The Lowrance Elite-7 Ti2 is equipped with an internal 16-channel GPS receiver and 10-Hz. This means it provides position updates 10 times per second. You can provide position improvements through WAAS, EGNOS and MSAS. It also has a GPS speed function and can calculate thefrom your boat depending on the GPS input. In terms of waypoints, you can save up to 3,000 in your memory or on a microSD card if you use one. Creation of paths and trace functions are available. The unit offers the possibility of creating and saving up to 100 routes and registering up to 100 trails in your memory. Each trail can have 10,000 plot points. In terms of graphics, the unit includes the basis of the US, which is based on the C-MAP graphics. These maps cover more than 4,000 US lakes with 1 meter contours. They do not offer super detail, but they show the limits between water and locate hot fishing places such as derivations, drops And the cover. The graphics base of the unit can always be updated, however. It is compatible with Navionics Platinum +, C-MAX MAX-N, C-MAP MAX-N +, or Insight Pro and Insight HD. But one of the best new features included in this unit is Genesis Live. This feature is similar to the Humminbird Autochart Live, and Garmin QuickDraw contours. It gives you the possibility to update the maps of your favorite lakes and fishing places with 1/2â € 2 in real time while sailing your boat. In terms of detail, you can reveal drop-down, ditches and other points that can make large fishing points. It offers a rather personalization level, which allows it to control transparency, the density of the contour, add the security shaving, and more. With respect to Genesis Live, it is important to mention that the contours are recorded and used from the memory card of the unit. Therefore, it will need at least one blank memory card inserted into the unit, and when it is removed or escapes from space, the characteristic will stop from recording. In addition, Genesis Live is more effective and provides the ELITE-7 TI2 has the SmartSteer function, offering automatic pilot and others for motorguide trolling engines XI5 / XI3; However, this requires the gateway motorquide pinpoint. The autopilot can automatically control the Trolling engine to navigate a one Cursor position, reference point or follow a predefined route or pattern. It also provides control for power anchors. Finally, but not least, the unit admits AIS data with the overlass of the table and the details of the destination container. However, it is not compatible with the radar. Features of the control unit and network capabilities First, this Lowrance fish search engine has a 7-inch screen, with a pixel matrix of 800h x 480V, TFT color. It has brought the backlight and provides excellent readability in direct sunlight and harshly as sharp as 85°. It is also impermeable IPX7. The unit has a tactile screen interface and operating system are very easy to use and highly customizable. There are divided screen options for up to 4 panels. Navigation through menu or zoom is quite fast. The sizes of the values on the screen, such as depth, for example, are also customizable and can change their position from dragging them into the locations where you want them. In terms of networks, the unit has a virtual Ethernet port, so you can transfer data between units through the Ethernet cable. It is also compatible with the NMEA port 2000 (1 x micro-C), in addition to it supports most of the NMEA 0183 sentences. The unit offers Wi-Fi connection and Bluetooth connectivity. Therefore, you can also synchronize your unit with your smart phone to get smart notifications from your phone on the unit or use your phone as a remote control for the unit. The unit has a For microSD card. You can use it for a Premium graphics card or for a data card for Genesis Live, Waypoint Backup or Data Transfer. Finally, this Fish Finder and ChartPlotter system includes rapid release gaubal support and a unit cover. An in-table surface mounting kit is also available, but it is not included. Pros Chirp 2D Sonar and Downscan; SIDESCAN capable (with an image transducer 3 in 1 of active images); HDI Skimmer included; 1,000 feet of depth capacity; Various functions of sounding, such as low-passing, fishrevedeal lower lock, scope of a scope, fish identification, sound recording, etc. C-map US Inland Wasemap included; Live gà © nesis included; Compatible with a wide range of personalized graphics, including nautical Insight Pro and HD, Navionics Hotmaps Premium, HOTSPOTS PRO Fishing, Lake Insight Pro and HD, C-MAX MAX-N by Jeppesen and Insight Genesis: Fast updates of graphics, rapid navigation through menu: High precision, 10 Hz GPS: Autopilot runs through SmartSteer, for Trolling XI5 engines: Waypoints, routes and follow-up functions; Easy-to-use taster screen navigation: Possibilities of presentation of 4 panel panels; Super bright screen, excellent readability; Wi-Fi and Bluetooth connectivity; MicroSD card slot reader for backup and data transfer; NMEA connectivity; GPS and Sonar superimpose data possibilities, through Insight GÃ ©nesis; Rapid disconnect assembly included; Unit cover included; Available in multiple language packets; Quite easy to install. The count without radar support; To use live génesis, vou need a microSD card as a support; Assembly on the board not included. Summary Lowrance Elite-7 TI2 HDI IS INLAND base is a fish search engine and a plotter that offers active images of images 3 in 1, 10 Hz GPS, base of basemap, live GÃ © nesis, wi- Fi and Bluetooth, capacities of higher networks and a wide range of other features. Includes the Skimmer HDI transducer for 2D and DowScan squeak. It is great for many types of boats, both for fresh water and for salt water. And, finally, it is a versatile tool, an excellent value for the price. Interactions of Reader Interactions
