Azur lane empyreal tragicomedy guide

DDs, CLs and CAs have their skills and such listed. This has helped reduce a lot of wasted space on the spreadsheet looks much better IMO. Added entries for the new aircraft (Avenger VT-18) and the Catalina, but their stats are not finished. The local columns of the following boats were changed to reflect the changes in the morning update, Episode 2 of the Anniversary Chain of Events: - USS CV Essex - IJN CV Taihou - FFNF DD Le Temeraire - USS SS Albacore - IJN CV Taihou - FFNF DD Le SS U-556 - KMS DD Z36 - HMS BB King George V - HMS DD Echo - KMS CL Koln retrofit Added some more entries for some of the new boats coming, but I don't have anything on them even more than names, so they're sitting on the master list for now. I've been busy. It's been done for a few days, but I just got to update the terminology to match the game (State of Logistics instead of State of Support, for example). Added entries for new boats arriving in the morning update: - IJN BB Tosa - IJN DD Hanazuki - HMS BC Little Renown - IJN DD Hanaz the master list. There are no statistics or information about any of them yet, they are listed for your future convenience. I left a few the same as the wiki for personal tastes and/or to fit them into the skill columns, but they are the same for most. I also fixed some incorrect incorrect skill. Mostly between "Order of Burn", "Arsonist", and some of the others that affect abilities. - MNF DD Le Malin - FFNF DD L'Optiatre added stats and skills from Emile Bertin (R). If you want a quide, look for a link to Aripanda's Azur Lane quide and hope someone can provide your LVL 100 stats. I forgot to update it when the patch fixed it. I can't add this because it would drastically skew the color classification (FDG LVL 120 numbers are disgusting), unless I change all the statistics from the spreadsheet to LVL 120. There was a lot added, so I won't add it here, but we're all stuck, INGRAHAM and Nautilus included. I'll be finishing with the last of the boats in a second, I just wanted to make this to-do list. The real ones have been on the sheet for a long time). As you get information about them, but they won't be on the eyelashes of your class until they're out, probably. Updated the local columns for the following boats to reflect the changes in the morning update and the iris of light and dark performance: - FFNF DD L'Opinigià ¢ Tre - MNF DD LE MALIN Updated the local Sims (R) column of HMS CL Swiftsure and the columns of acquisition for some of the Winter Crown ships and other ships from the latest upgrade. 120 buckets on and only 2 of the new ships built ... He changed the local Sims (R) column to reflect his addition in today's update. - DD Shirakami Fubuki - SS Minato Aqua - CV Tokino Sora - CV Ookami Mio - CVL MURASAKI SHION - CA NAKIRI AYAME - DD NATSUIRO MATSURI Changes in the maize update ~±ana. The purpose of this spreadsheet is to provide relevant and focused (or simplified) data that can be and compare quickly and easily. The tab of the master list contains all the boats in the game, its maximum statistics LVL 125 and the first node that can be set to them and / or their types of construction and schedules. I finished adding and updating the new new (Both normal and sub types) and AA guns. Also did a pass over the DPS numbers to make sure everything was up to date, and added a new column to seperate the distance a weapon will fire at a target, and the distance the shells will travel after being fired. I held off on adding them because I wasn't sure they'd be coming to AL Global, but they've said we're getting it early next year, so I finally added them: - IJN CV Akagi (Muse) - MNF BB Gascoigne (Muse) - KMS CA Admiral Hipper (Muse) - USS CL Cleveland (Muse) - HMS CL Sheffield (Muse) 11/08/2019: Added Shigure (R) and Yuugure (R) to the spreadsheet. Skybound Oratorio CL guns are updated, Aircraft info still incomplete. Added entries for the 5 new research ships coming in the next update, I don't have info on stats or skills yet though; - FFNF BB Champagne - KMS BC Odin - HMS CA Drake - HMS CA Cheshire - KMS CL MainzI'll keep an eye out and add their stats and skills as soon as I see them pop up and/or I get in game after the update and look up their skills there. Got around to updating skill names and descriptions for the new ships. Updated the icon for the Iris DD gun to match the new update, and added the new event ship along with stats and skills, - MNF DD TartuI've also changed all research ships' luck to 5, from 0, since you can get them to 5 luck from Fate Simulation. (Part 2) Went ahead and added them to their individual tabs anyway, with temporary skill descriptions. Added HMS CA London Retrofit Added stats for the following ships and put them in their corresponding tabs; - IJN SS I-25 - IJN SS I-25 - IJN SS I-168 - KMS SS U-101 - KMS U-101 - KMS U-101 to increase the lvl cap to 125 soon. I mistakenly had her retrofit listed as available in the EN But it's not in us yet. Change the local column for Achilles (R). I didn't realize that she was already out on Japà 3 n. heavy cruiser, I just included the designation Large Cruisers to be exhaustive and possibly proof of the future, in case you are released S warehouses that are also classified as Large Cruisers. Updated the airstar page a little too, includes some well-deserved links that should be added before NO LVL 100 statistics on the new Round of ships of Still research, what is understandable. He added some of the new ships yet, but I am pending and I updated them once they are on the wiki. Christmas!
The gear is still darking over time, I'm going to add another notice here when I finish, although honestly it is probably ends up with the additions of Inverted Orthant events before it ends with all the new gear. He added the following ships to the calculation sheet to reflect the changes in the daily update and event, â € œTherern Overture.â € »no statistics in the ships at the moment, will be updated again When you are finished, I update them as you get information for them. skills were added for the 5 new research vessels and put them in their respective tabs. Woops. Finally, there are 3 columns for what equipment they use, and a column that shows the efficiency of that gear (100/110/120, for example, would mean that its main weapon would work at 100% efficiency, its secondary to 110%, and so) Even in the process of adding statistics and skills, it will update this record of changes when all is at the height of the standard. Only some general improvements and additions: - created a new ASW gear tab: made some mild changes in the Updated Local Columns update to reflect the changes in the daily update. Some of the numbers are missing, and I do not play the JF
version, so I am completely dependent on the wiki for these numbers (as always, for new things). Added entries for new versions of the best weapons is quite important. While there was some changes and adjustments, I have also added the "DPS RAW" column by Wiki, and tried to organize it in a way that shows how important the type of munication is is the production of final damages. You will add the gear and, just later. Edge: I had time, so I obtained the auxiliary equipment, all trapped USS BB Alabama - USS CVL Bataan - USS CA Baltimore - USS CI Birmingham -

I have added the statistics and skills of the new ships; - IJN CV CV - IJN BB KII - IJN CVL Chitose -
IJN CVL Chiyoda - IJN CA Kumano - IJN AE Kashino - Specialized Bulin MKIIII I have made a new tab for repair and munition boats. Acquisition column updated in Masterlist to reflect changes in today's update. It has been incredibly ultile for me while I got into the game. I will do it first in the Masterlist and then I will copy them to the class tabs when it finishes, so that the color classification does not distort. I have added all the planes, but I'm not sure I want another duplicate tab after +10 as I did for weapons (only blue quality) and a combatant and torpedo bomber (also blues), but I do not have any statistics or information
about them yet, except for the names. The wiki pages of the ships have returned to normal, so I finished updating the statistics in the master list. They will remain in the master list tab until they are added to the game. Added the new Iris / Vichya Naves (after the repetition that is coming this week, there is another coming Iris event. The new 138.6mm pistol that uses the old icon used by the original 138.6 mm. I will update when you see the missing numbers in the future. The wiki now has statistics LVL 100. However, I am a stalker, so no I will see me in any of the channels for the most part. If you are not familiar with the calculation sheets, the chips are at the bottom. Updated descriptions of the skills of the four boats that had skills related to ASW, Chaser, Koln, Cooper and Odin. Finally he turned around to add the event ships to his appropriate chips with his skills and statistics. DD weapons are made, CA and BB. The local columns of the following boats have
been changed to reflect the changes in the morning update: - HMS CL Curacoa (R) - IJN DD Nagatsuki for new ships coming in the morning update.
