Tekken 7 sergei dragunov x reader lemon. Sergei dragunov tekken 7 combos.

I'm curious what you think of him and if you want me to come back on the next show. Personally, I think he's one of the best characters on the show because of his cool design and his brutal fighting style. I also believe that the difficulty in using it is perfect, it is not too difficult and not too easy to play. Some fans are disappointed by how they have tonic along its difficulty in T7 in particular S1 where the only moves you need were D2 and WR2, but should not be important as long as © becomes more people to play with more people. Overall, he is a fantastic character and brings a lot of charm to the series. can move between his ability to control long-range space and his ability to attack continuously. It can combine strong moves with the advantage of blocking until the opponent created it, and if they continue to move, its surroundings with its powerful swipes can be realized. Show the work. Its wallow is one of the strongest in the game, and it has a wide range of tools, covering a huge variety of situations, despite still having the useful moves you can take. Keep it in your pocket to make sure that your opponent Glovini. Dragunov PanoramicaBesides is an inexorably moving pit bull, also has long legs and a number of moves that allow him to control the space and keep his opponent also to gamma 2, which is not the range. especially convenient for many other characters. The ideal range of Dragunov is a range of 0 (only in front of them) or 2 (two signs back). Hydrragunov Top MovesDF + 1Average Speeds are fast to 13F, which should trigger any effort; However, it is susceptible of jumping sideways and sometimes backwards (depending on the distance). Good for those who prefer to make follow-up attempts with Jabs. When you hit, give a significant advantage for the extra effort to follow, and when locked it is only -2, which allows a kind of frying game to slide. Another advantage is that DF + 1 followed NCC with DF + 1,4; 1,4; Trying a stab would be who, let it happen. (Be careful at the time of monitoring not about a ch, and this is difficult to confirm a CH, but there is an option there.) B + 4.3 Another good middle road that reaches everyone; Like B + 1 + 2, it is quite linear (even if it has a long reach). It is safe on the block, even if negative, discouraging any real followers after this, but at 15f captaining people who probably predict B + 1 + 2 and will try to reproduce it. It does not have a reward purely B + 1 + 2, but besides being safe from the wall, this move could lead to devastating UPS. The move is not confined to the block so that 3 people can be overturned. B + 4 does not have a real track (3 has a number.) B + 1 + 2 and will try to reproduce it. It does not have a reward purely B + 1 + 2, D + 3 + 4 if open, nor a complete launch like DF + 2, but besides being safe from the wall, this move could lead to devastating DF + 2. 4,213This is also a possible track; Because this is a NCC, you can try this for people who seem to try to counterattack with something more slow than a stab; Because B + 1 + 2 can be interrupted by more lens of his 21 frame rate, those who try something risky could be ch. This will inflict massive damage and will make it back to +5 frames, leveling again. If the move is not, the combo will not end, but B + 4.2 still provides Dragunov an advantage when he was hit. The string is linear. Dragunov Pro and Conspros: Top 3 WS Punishment. Strion Punistion. Cons: No Hopkick. Slow chayers. High-hit boxes. Some of her in battle.
